## **I. JURISDICTION AND GENERAL PROVISIONS**

This Administrative Order on Consent ("Order") is entered into voluntarily by the United States Environmental Protection Agency, Region IX ("US-EPA"), the Respondents listed in Attachment A ("Respondents"), and the Responding Federal Agencies ("RFAs") listed in Attachment B. This Order provides for the performance of a removal action by Respondents in connection with the property located at 13331 Highway 33 in Patterson, California, the "PRC Patterson Superfund Removal Site" or the "Site." Respondents are required by this Order to conduct the Removal Action described herein to abate an imminent and substantial endangerment to the public health, welfare or the environment that may be presented by the actual or threatened release of hazardous substances at or from the Site. This Order also acknowledges the payment made in contribution on behalf of the RFAs pursuant to an "Interim Agreement for Reimbursement of Response Costs," dated February 10, 2000 ("February 2000 Agreement") and provides for a final contribution and resolution of liability of the RFAs.

This Order is issued pursuant to the authority vested in the President of the United States by Sections 104, 106(a), 107, 122(a), and 122(h) of CERCLA, (42 U.S.C. Sections 9604, 9606(a), 9607, 9622(a), and 9622(h)), respectively, and delegated to the Administrator of the United States Environmental Protection Agency by Executive Order No. 12580, January 23, 1987, 52 Federal Register 2923, and further delegated to the US-EPA Regional Administrators by US-EPA Delegation Nos. 14-14-A and 14-14-C, and duly redelegated to the Superfund Division Director for EPA Region 9. As such, this Order embodies a settlement between Respondents, RFAs, and the US-EPA under the provisions of CERCLA.

Respondents' and RFAs' participation in this Order shall not constitute or be construed as an admission of either liability or of the Findings of Fact and Conclusions of Law and Determinations contained in this Order except in a proceeding to enforce the terms of this Order. Respondents agree to comply with and be bound by the terms of this Order. Respondents and RFAs further agree that they will not contest the basis or validity of this Order or its terms.

US-EPA acknowledges the substantial work performed by the Patterson Environmental Response Trust complying with the terms of the Unilateral Administrative Order ("UAO") 98-12, as amended by UAO 98-12A, for removal activities at the Site. In this regard, US-EPA finds that the work performed by the Patterson Environmental Response Trust up through and including the Effective Date as defined in Section XXII of this Order, has been consistent with the requirements of UAO 98-12 and UAO 98-12A and the National Contingency Plan.

## **II. PARTIES BOUND**

This Order applies to and is binding on US-EPA, the Responding Federal Agencies and on Respondents, their successors and assigns. Any change in ownership or corporate status of Respondents including, but not limited to, any transfer of assets or real or personal property shall

Administrative Order Consent 2000-15  
PRC Patterson Superfund Removal Site

not alter Respondents' responsibilities under this Order. Respondents are jointly and severally liable for carrying out all activities required by this Order. Compliance or noncompliance by one or more Respondents with any provision of this Order shall not excuse or justify noncompliance by any other Respondents.

Respondents shall ensure that their contractors, subcontractors, and representatives receive a copy of this Order and comply with this Order. Respondents shall be responsible for any noncompliance with this Order.

### III. DEFINITIONS

Unless otherwise expressly provided herein, terms used in this Order which are defined in CERCLA or in regulations promulgated under CERCLA shall have the meaning assigned to them in CERCLA or in such regulations. Whenever the terms listed below are used in this Order, or in the attachments hereto and incorporated hereunder, the following definitions shall apply:

"Administrative Order on Consent," "AOC" or "Order" shall mean this Administrative Order on Consent for Removal Action, US-EPA Docket No. 2000-15, and all attachments hereto.

"Amended Unilateral Administrative Order," "Amended UAO" or "UAO 98-12A" shall mean the Amended Unilateral Administrative Order For Performance of Removal Action, US-EPA Docket No. 98-12A, issued November 22, 1999 and effective November 30, 1999, and all exhibits attached thereto. UAO 98-12A amended and superceded UAO 98-12, defined below.

"ARCO Order" shall mean the Administrative Order, US-EPA Docket No. RCRA 7003 98-09-01, issued by US-EPA to the Atlantic Richfield Company ("ARCO") on April 10, 1998.

"CERCLA" shall mean the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended by the Superfund Amendments & Reauthorization Act of 1986, 42 U.S.C. Section 9601 et seq.

"Chevron Order" shall mean the Administrative Order, US-EPA Docket No. RCRA 7003 98-09-02, issued by US-EPA to Chevron Corporation ("Chevron") on April 10, 1998.

"Contractor" shall mean Respondents' contractors and subcontractors performing the installation/construction, and operation and maintenance activities relating to any of the specific actions at the Site which Respondents are required to perform.

"Day" shall mean a calendar day unless expressly stated to be a business day. "Business Day(s)" shall mean a day other than a Saturday, Sunday, or federal holiday. In computing any period of

Administrative Order Consent 2000-15  
PRC Patterson Superfund Removal Site

time under this Order, where the last day would fall on a Saturday, Sunday, or federal holiday, the period shall run until the close of business of the next Business Day.

“National Contingency Plan” or “NCP” shall mean the National Oil and Hazardous Substances Pollution Contingency Plan promulgated pursuant to Section 105 of CERCLA, 42 U.S.C. Section 9605, codified at 40 C.F.R. Part 300.

“Oversight Costs” shall mean all past, present and future costs, including, but not limited to, direct and indirect costs and interest incurred or paid by the United States, its employees, agents, contractors, consultants, and other authorized representatives, with regard to the Site.

“Paragraph” shall mean a portion of this Order identified by an Arabic numeral, unless otherwise indicated herein.

“Parties” shall mean US-EPA, all RFAs, and all those entities identified as Respondents in Attachment A of this Order.

“Respondents” shall mean those entities listed in Attachment A of this Order, both individually and collectively. Respondents are persons or entities who have been identified by US-EPA as transporters or generators of waste oil, sludge or oily wastewater, in excess of 5,000 gallons, sent to the Site between 1980 and 1997.

“Responding Federal Agencies” excludes US-EPA, and shall mean only those agencies, departments and instrumentalities of the United States listed in Attachment B.

“Removal Action” shall be those specific work items Respondents are required to perform at the Site pursuant to this Order, as set forth in Section VII of this Order.

“Section” shall mean a portion of this Order identified by a Roman numeral and may include one or more paragraphs.

“Site” shall mean the PRC Patterson Superfund Removal Site, encompassing the former PRC Patterson facility of approximately 20 acres, located at 13331 Highway 33 in Patterson, Stanislaus County, California, approximately 2 miles north of the City of Patterson. A Site map is attached as Attachment C.

“State” shall mean the State of California, and all of its political subdivisions, including the California Environmental Protection Agency’s Department of Toxic Substances Control (“DTSC”).

Administrative Order Consent 2000-15  
PRC Patterson Superfund Removal Site

"Unilateral Administrative Order" or "UAO 98-12" shall mean the Unilateral Administrative Order For Performance of Removal Action, US-EPA Docket No. 98-12, issued August 12, 1998, and all exhibits attached thereto.

"United States" shall mean the United States of America, and all of its departments, agencies or instrumentalities.

"US-EPA" shall mean the United States Environmental Protection Agency and any successor departments or agencies of the United States.

"Vernalis Site" shall mean the property at 1141 Highway 33 in Vernalis, California, which is the subject of the ARCO Order, and upon which is located, inter alia, a large storage tank containing over 1 million gallons of sludge and oil.

#### **IV. FINDINGS OF FACT**

1. The Site is located at 13331 North Highway 33 in Patterson, Stanislaus County, California. The approximately 20-acre Site is surrounded primarily by agricultural land. The City of Patterson is located approximately two miles south of the Site. There are numerous irrigation canals located in the immediate vicinity of the Site. Several of these canals drain into Del Puerto Creek, which flows within a mile of the Site. Del Puerto Creek flows into the San Joaquin River. A Site map is attached as Attachment C.
2. Facility operations were commenced in the early 1980's by Recycletron Oil Inc. ("RCI"), a California corporation, doing business as Refineries Services. RCI was a recycler of waste oil and oily water. In 1989, RCI merged with Petroleum Recycling Corporation, a California corporation. Shortly thereafter, a wholly separate California corporation, PRC Patterson ("PRC") was formed. PRC stopped accepting wastes in October, 1996, but operated the Site continuously until sometime in 1997.
3. On October 31, 1997 US-EPA received a verbal request for assistance at the Site from DTSC. US-EPA, in conjunction with DTSC, conducted a preliminary inspection of the facility on that date and made the following observations: US-EPA observed that the operator of the Site apparently had abandoned the facility and that general site conditions had begun to deteriorate. The facility lacked security and had been heavily vandalized. Because of the age and condition of the petroleum storage tanks and containers at the Site, many tanks and containers appeared to pose a substantial risk of failure. Several of these tanks were leaking, and inspection revealed that one of the larger tanks had failed catastrophically in the past.
4. On November 18, 1997, following the receipt of a written request for assistance from DTSC, US-EPA initiated an emergency response action to stabilize these unsafe and

Administrative Order Consent 2000-15  
PRC Patterson Superfund Removal Site

dangerous conditions which presented an endangerment to the public health, welfare, and the environment. US-EPA provided Site security, upgraded the perimeter fence and berm, and pumped down the liquid level in several storage tanks which were either overflowing or on the verge of overflowing.

5. From December 1 through December 6, 1997, US-EPA conducted an assessment of the Site. Results of sampling and analyses conducted during this assessment are presented in the March 1998 report entitled "Enviro-pur/PRC Patterson Oil Recycling Facility Removal Assessment" prepared by Ecology and Environment. The following is a brief inventory of items and materials stored onsite at the time that the report was published:
  - a. Numerous process tanks, storage tanks, pressure tanks, pumps, a water treatment system, filtration equipment, heating, distillation and refining equipment, office trailers, laboratory trailers, and a large warehouse. The tanks and equipment contained varying amounts of oil, sludge, wastewater or mixtures of all three substances. Many of the tanks were observed to be leaking. Two of the large storage tanks had large holes in their roofs.
  - b. Several of the large storage tanks at the Site contained large volumes of liquid. These tanks, identified in Attachment C, are referred to as Storage Tank S1, Storage Tank S2, Storage Tank S3, Storage Tank S4, and Storage Tank S5. Excluding Storage Tank S3, which is being addressed by Chevron pursuant to the Chevron Order, the tanks contained a cumulative total of approximately 130 million gallons of waste oil and water.
  - c. There were more than 1,100 drums present onsite. The majority of these drums were labeled "drained used oil filters." Upon inspection by US-EPA, these drums appeared to contain drained used oil filters as labeled.
  - d. There were approximately 40 drums that contained chemical product.
  - e. 14 roll-off bins, labeled as hazardous waste dirt bins, were present onsite.
  - f. Two trailers used as onsite laboratories contained various chemicals apparently used for testing of incoming oil.
6. The sampling conducted by US-EPA's contractor of the waste oil and oily wastewater in Storage Tanks S1, S2, S4, S5 and P2, confirmed the presence of Cadmium, Chromium, Copper, Lead, Mercury and Nickel.
7. The materials stored at the Site contained hazardous substances. The threat of a release of these hazardous substances was exacerbated by the aging and dilapidated condition of

Administrative Order Consent 2000-15  
PRC Patterson Superfund Removal Site

the tanks, the lack of a roof on Storage Tank S4, several holes in the roof of Storage Tank S1, a large hole in the roof of Storage Tank S3, seasonal rains, the lack of regular or routine inspection and maintenance, and the fact that PRC Patterson Inc., the Site owner and operator, has abandoned the entire Site.

8. The Chevron Order, issued on April 10, 1998 requires that Chevron clean up Storage Tank S3 at the Site. EPA has indicated to the Trust that Chevron has complied with the Chevron Order, and conducted the removal action required by that order at Storage Tank S3.
9. The ARCO Order, also issued on April 10, 1998, directed ARCO to conduct a separate removal action in connection with a large storage tank containing over 1 million gallons of sludge and oil (the "Vernalis Storage Tank") located at the Vernalis Site. In addition, ARCO was identified as a potentially responsible party for this Site.
10. On August 12, 1998, US-EPA issued UAO 98-12, requiring that, among other things, the 53 entities identified in Attachment 1 thereto, conduct a removal action with respect to the waste oil, sludge, and oily wastewater present at the Site. An original group of 19 cooperating parties, as described below, committed to undertaking the Removal Action required by UAO 98-12.
11. In response to UAO 98-12, a group of 19 of the 53 potentially responsible parties named as respondents formed the Patterson Environmental Response Group ("Group") to cooperate in complying with the terms of UAO 98-12. In furtherance of that goal, the individual members of the Group, identified in Attachment D to this Order, entered into a Site Participation Agreement on October 22, 1998, as amended on February 16, 1999 and on November 30, 1999 ("the Stage II Site Participation Agreement").
12. The members of the Group also established the Patterson Environmental Response Trust ("Trust") to provide a mechanism for undertaking and funding the Removal Actions required by UAO 98-12. The Trust was established by a Declaration and Agreement of Trust effective October 22, 1998, amended on February 16, 1999 and on November 30, 1999.
13. The members of the Group submitted a notice of their intent to comply with UAO 98-12 US-EPA. The Group, through the Trust, then submitted a sampling and analysis plan, a health and safety plan and a drum removal work plan pursuant to the requirements of Section VIII C, Paragraph 28, of UAO 98-12, and began performing the removal activities required by UAO 98-12. At all times relevant, the Trust, and accordingly the individual members of the Group, have been in compliance with the terms of UAO 98-12.

Administrative Order Consent 2000-15  
PRC Patterson Superfund Removal Site

14. On November 22, 1999, US-EPA issued an amendment to UAO 98-12, which became effective on November 30, 1999. This Amended Unilateral Administrative Order, UAO 98-12A, supersedes UAO 98-12, and includes all the parties named in the Original UAO, (referred to as "Original Respondents") as well as additional responsible parties in connection with the Site. US-EPA's Amended UAO refers to these additional responsible parties as "New Respondents." In UAO 98-12A, US-EPA also expanded the volumetric threshold for being named as responsible party at the Site to any entity that generated or transported in excess of 20,000 gallons of waste sent to the Site between 1980 and 1997.
15. From November 1, 1982 through December 11, 1996, the total volume of waste deposited at the Site was in excess of 130 million gallons. The total cumulative known waste deposited at the Site by the Respondents to this Order is approximately 21 million gallons, or approximately 16 percent of that total volume. The total cumulative known waste deposited by or on behalf of the RFAs to this Order is approximately 5.1 million gallons, or approximately 4 percent of that total volume. Documentation of most wastes at the Site does not sufficiently detail the characteristics and particular qualities of the wastes. Therefore, because the wastes at the Site were commingled, there is no evidence suggesting that the wastes contributed by each Respondent to the Site are more toxic or of significantly greater hazardous effect than other waste at the Site.
16. On December 2, 1999, the Trust provided the New Respondents with the option of either joining the Trust or settling their respective liability to the Trust and to the US-EPA by signing a Cash-Out Settlement Agreement and making a cash settlement payment to the Trust. US-EPA agreed that New Respondents that either joined the Trust or signed the Cash-Out Settlement Agreement would satisfy their individual obligations to comply with UAO 98-12A.
17. Thereafter, the Trust, in cooperation with US-EPA, provided other additional potential responsible parties that were not then named to UAO 98-12 or 98-12A (herein identified as "Other PRPs"), with the option of either joining the Trust or settling their respective liability to the Trust and to US-EPA by signing a Cash Out Settlement Agreement and making a cash settlement payment to the Trust. US-EPA further agreed that Other PRPs that either joined the Trust or signed the Cash Out Agreement would satisfy their individual obligations under CERCLA and to US-EPA for the work required by UAO 98-12A.
18. As a result of the Trust's offer to the New Respondents and Other PRPs, two additional entities joined the Group and the Trust. These entities are identified in Attachment F. Further, New Respondents and Other PRPs agreed to the cash out settlement offered by the Trust, have signed a Cash Out Settlement Agreement and have made a contribution

Administrative Order Consent 2000-15  
PRC Patterson Superfund Removal Site

that is acceptable as settlement with the Trust. These settling parties are also Respondents to this Order and are identified in Attachment A.

19. The RFAs have made payments toward the costs of performance of the Removal Action required by UAO 98-12 and UAO 98-12A, pursuant to an "Interim Agreement for Reimbursement of Response Costs," dated February 10, 2000 ("February 2000 Agreement"), and have entered into a final "Cash-Out Settlement Agreement" with the Trust and its Members for an additional payment on behalf of the RFAs. These contributions are acceptable as settlement with the Trust.
20. Based on the large volumes of waste oil, sludge and oily wastewater present at the Site, cleanup of the Site is costly and time consuming. US-EPA and the Trust estimate that conducting the Removal Action at the Site has cost approximately 9.5 million dollars (\$9,500,000.00). Through the Trust, all of the Respondents and RFAs have funded the Removal Action, although currently available information indicates that each RFA and Respondent's volumetric contribution involves two percent (2%) or less of the wastes at the Site. Accordingly, each Respondent's or RFA's contribution toward response costs, as based on volumetric waste contribution, would involve only a minor portion of the response costs.
21. The Group, through the Trust, has been performing the work required under UAO 98-12A and at all relevant times has been in compliance with UAO 98-12A. The Removal Action to abate the imminent and substantial threat to human health and the environment is almost complete, subject to the requirements of this Order.
22. There are insolvent or defunct parties that contributed waste to the Site but that cannot contribute to the costs of cleanup. Through this Order, US-EPA is exercising its discretion under Section 122(h) of CERCLA, 42 U.S.C. §9622(h), and in conformity with its "Interim Guidance on Orphan Share Compensation for Settlers of Remedial Design/Remedial Action and Non-Time Critical Removals" (June 4, 1996), to compromise and settle claims under Section 107 of CERCLA, 42 U.S.C. §9607, by providing Respondents with a covenant not to sue, as set forth in Section XIV herein, without reimbursement of Oversight Costs.

## **V. CONCLUSIONS OF LAW AND DETERMINATIONS**

Based on the Findings of Fact set forth above, and the Administrative Record supporting this action, US-EPA has made the following conclusions of law and determinations:

1. The PRC Patterson Superfund Removal Site is a "facility" as defined by Section 101(9) of CERCLA, 42 U.S.C. Section 9601(9).

Administrative Order Consent 2000-15  
PRC Patterson Superfund Removal Site

2. The contaminants found at the Site, as identified in Section IV or this Order, "Findings of Fact," include "hazardous substances" as defined by Section 101(14) of CERCLA, 42 U.S.C. Section 9601(14).
3. Each Respondent, as identified in Attachment A, is a "person" as defined by Section 101(21) of CERCLA, 42 U.S.C. Section 9601(21).
4. Each RFA, as identified in Attachment B, is a "person" as defined by Section 101(21) of CERCLA, 42 U.S.C. Section 9601(21).
5. Each Respondent and RFA may be liable under Section 107(a) of CERCLA, 42 U.S.C. Section 9607(a).
6. The conditions that existed at the Site, as described in UAO 98-12, UAO 98-12A and Section IV of this Order ("Findings of Fact"), constituted an actual or threatened "release" of a hazardous substance from the facility as defined by Section 101(22) of CERCLA 42 U.S.C. Section 9601(22).
7. The actual or threatened release of hazardous substances from the Site presented an imminent and substantial endangerment to the public health, welfare, or the environment within the meaning of Section 106(a) of CERCLA, 42 U.S.C. Section 9606(a), which included, but was not limited to the following:
  - a. actual or potential exposure to nearby human populations, animals, or the food chain from hazardous substances, pollutants or contaminants; and
  - b. hazardous substances, pollutants or contaminants in drums, barrels, tanks, or other bulk storage containers, which posed a threat of release.
8. The conditions at the Site constituted an imminent and substantial threat to public health, welfare, or the environment based on a consideration of the factors set forth in the NCP at 40 C.F.R. Section 300.415(b), and that the actions required by UAO 98-12, UAO 98-12A and this Order are necessary to protect the public health, welfare, or the environment.
9. Prompt settlement with each Respondent and RFA is practicable and in the public interest as may be required within the meaning of Section 122(a) of CERCLA, 42 U.S.C. Sections 9622(a).
10. The actions required by this Order, if properly performed, will be deemed consistent with the NCP, and are appropriate to protect the public health, welfare, or the environment.

Administrative Order Consent 2000-15  
PRC Patterson Superfund Removal Site

11. The actions undertaken prior to the Effective Date by the Patterson Environmental Response Trust substantially achieved the actions required by UAO 98-12 and UAO 98-12A. This Order directs the final activities required to complete the Removal Action at the Site.

**VI. NOTICE TO THE STATE**

US-EPA has notified the State of California of the issuance of this Order pursuant to Section 106(a) of CERCLA, 42 U.S.C. Section 9606(a) by providing the Department of Toxic Substances Control (DTSC) a copy of this Order.

**VII. ORDER AS TO RESPONDENTS**

Based upon the foregoing Findings of Fact and Conclusions of Law and Determinations, and the Administrative Record for this Site, it is hereby ordered and agreed that Respondents shall comply with the following provisions, including but not limited to any attachments to this Order, and all documents incorporated by reference into this Order. Respondents, either themselves or by retaining Contractors as set forth in this Order, shall complete the Removal Action as provided for in UAO 98-12, UAO 98-12A and this Order, and perform the following actions:

1. Designation of Contractor, Project Coordinator, and On-Scene Coordinator

Respondents have retained, and US-EPA has approved, Clayton Group Services, Inc. ("Clayton") to perform the Removal Action. Respondents shall notify US-EPA of the names and qualifications of any other Contractors or subcontractors retained to perform any part of the Removal Action under this Order at least ten (10) business days prior to such new entities' commencement of work at the Site. US-EPA retains the right to disapprove of any or all of the Contractors or subcontractors retained by Respondents. If US-EPA disapproves of a contractor selected by Respondents, then Respondents shall retain a different contractor fifteen (15) business days following US-EPA's disapproval and shall notify US-EPA of that contractor's name and qualifications within twenty (20) business days of US-EPA's disapproval.

Respondents have designated, and US-EPA has approved, Dwight Hoenig as the Project Coordinator, responsible for administration of all the Respondents' actions at the Site. To the greatest extent possible, during The Removal Action at the Site the Project Coordinator shall be present or readily available. Receipt by Respondents' Project Coordinator of any notice or communication from US-EPA relating to this Order shall constitute receipt by all Respondents.

US-EPA has designated Richard Martyn, an employee of Region IX of US-EPA, as its primary On-Scene Coordinator (OSC), and designated representative at the Site, who shall have the

Administrative Order Consent 2000-15  
PRC Patterson Superfund Removal Site

authorities, duties, and responsibilities vested in the OSC by the NCP. Respondents shall direct all submissions required by this Order to the OSC at US-EPA, Region IX, 75 Hawthorne Street, San Francisco, California 94105.

Consistent with the provisions of this Order, US-EPA designates John Jaros as an alternate OSC, in the event the designated OSC, Rich Martyn, is not present at the Site, has expressly delegated duties or responsibilities to the alternate OSC, or is otherwise unavailable. The alternate OSC shall have the authority, duties and responsibilities vested in the OSC when acting in the stead of the primary OSC. Nothing in this Order shall limit the authority of the US-EPA OSC under federal law.

US-EPA and Respondents may change their respective primary and alternative OSC and Project Coordinator. Notification of such change shall be made by notifying the other Party in writing at least five (5) days prior to such change, except in case of emergency, in which case notification shall be made orally followed by written notification as soon as possible.

2. Work to Be Performed

The Respondents shall perform the following tasks, which shall constitute the Removal Action under this Order:

- a. Respondents shall maintain compliance with the duties and obligations set forth in UAO 98-12 and UAO 98-12A, the terms of which are incorporated herein by reference. Respondents further are ordered to perform all Removal Actions and make submittals and certifications as set forth below within the time schedules specified. Due dates falling on a Saturday, Sunday, or federal holiday will be automatically extended to the next Business Day.
- b. Clayton has been submitting monthly progress reports ("Progress Reports") to US-EPA pursuant to the requirements of UAO 98-12 and UAO 98-12A. Additional Progress Reports are not required, unless US-EPA provides written notification to Respondents requiring the submission of additional Progress Reports, which in any case shall not be required after US-EPA issues the Notice of Completion, as provided under Section XIX of this Order. Any obligation to provide additional Progress Reports shall be applicable to all Respondents.
- c. Pursuant to and in compliance with UAO 98-12 and UAO 98-12A, the Trust has submitted to US-EPA and obtained approval of a Sampling and Analysis Plan and a Health and Safety Plan prepared by Clayton. All work for the Removal Action shall be consistent with the approved Health and Safety Plan.

Administrative Order Consent 2000-15  
PRC Patterson Superfund Removal Site

- d. Pursuant to and in compliance with UAO 98-12 and UAO 98-12A, the Trust has implemented the tasks described in the Sampling and Analysis Plan, and the Trust shall continue such tasks as required to complete the Removal Action.
- e. Pursuant to and in compliance with UAO 98-12 and UAO 98-12A, the Trust has submitted, and US-EPA has approved a Tank and Drum Removal Work Plan.
- f. Pursuant to and in compliance with UAO 98-12 and UAO 98-12A, the Trust has initiated, and made substantial progress with respect to the tasks described in the Sampling and Analysis Plan and the Tank and Drum Removal Work Plan, as supplemented and amended with US-EPA's approval. The various reports, work plans and other documents, which US-EPA has approved and which specifically define the scope of The Removal Action required under UAO 98-12, UAO 98-12A and this Order, are identified in Attachment E. The Trust shall continue such tasks under the Sampling and Analysis Plan and the Tank and Drum Removal Work Plan, and such other tasks as the OSC requires to maintain consistency with the NCP, until completed.
- g. Pursuant to and in compliance with UAO 98-12 and UAO 98-12A, the Trust provided security for the Site. US-EPA notified the Trust in August 2000 that security was no longer required at the Site. Therefore, the Trust's obligation to provide security at the Site is terminated.
- h. All Contractors, transporters and treatment, storage, disposal or recycling facilities used or proposed for use during this Removal Action are subject to US-EPA approval. Respondents must demonstrate to US-EPA's satisfaction that the waste is or is not a Listed or Characteristic Hazardous Waste as defined in 40 C.F.R. Part 261. All subsequent handling, transport and disposal shall be conducted in accordance with this waste classification.
- i. All documents, including technical reports, and other correspondence to be submitted by the Respondents pursuant to requirements of this Order, shall be sent by overnight mail pursuant to Section XXIII of this Order, "Provision of Notice," and shall be deemed submitted on the date received by US-EPA. Respondents shall submit two (2) copies of each document to US-EPA, and two (2) copies to DTSC. Copies to DTSC shall be delivered via first class U.S. mail.
- j. US-EPA shall review, comment on, and approve or disapprove each plan, report, or other deliverable submitted by Respondents pursuant to the requirements of this Order, and provide notice of such comments to the RFAs. US-EPA comments on draft deliverables shall be addressed by the Respondents. US-EPA shall notify the Respondents and the RFAs in writing of US-EPA's approval or

disapproval of a final deliverable. In the event of any disapproval, US-EPA shall specify the reasons for such disapproval, US-EPA's required modifications, and a time frame for submission of the revised report, document, or deliverable. If the modified report, document or deliverable is again disapproved by US-EPA, US-EPA shall first notify the Respondents and the RFAs of its disapproval of the resubmitted report, document, or deliverable, and then may draft its own report, document or deliverable and incorporate it as part of this Order, or may conduct the remaining Removal Action required by this Order.

- k. For purposes of this Order, US-EPA's authorized representatives shall include, but not be limited to, any consultants and contractors hired by US-EPA to oversee activities required by this Order.

3. Effect of Noncompliance with Work Performance and Schedule

Except as otherwise stated in this Order, any noncompliance with the actions to be performed or the schedules set forth within Section VII, Paragraph 2, shall be considered a violation of this Order.

4. Final Report

Within thirty (30) days after completion of all actions required under this Order, the Respondents shall submit for US-EPA review and approval a Final Report summarizing the actions taken to comply with this Order, and shall provide a copy of such Final Report to the RFAs. The Final Report shall conform, at a minimum, with the requirements set forth in Section 300.165 of the NCP entitled "OSC Reports." The Final Report shall include a good faith estimate of total costs or a statement of actual costs incurred in complying with UAO 98-12, UAO 98-12A and this Order, a listing of quantities and types of materials removed off-site or handled on-site, a discussion of removal and disposal options considered for those materials, a listing of the ultimate destination of those materials, a presentation of the analytical results of all sampling and analyses performed, and accompanying appendices containing all relevant documentation generated (e.g., manifests, invoices, bills, contracts, and permits). In addition, the Respondents shall certify, through their Contractors, that the Final Report is complete and accurate to the best of their collective knowledge.

5. Access to Property and Information

Respondents shall obtain and provide access to the Site and off-site areas to which access is necessary to implement this Order, and provide access to all records and documentation related to the conditions at the Site and the actions conducted pursuant to this Order. Such access shall be provided to US-EPA employees, contractors, agents, consultants, designees, representatives, and State of California representatives. Respondents' designated contractor pursuant to

Administrative Order Consent 2000-15  
PRC Patterson Superfund Removal Site

Section VII, Paragraph 1 of this Order, has entered into a Site Access Agreement with the Trustee in Bankruptcy for PRC Patterson, Inc., the owner and former operator of the Site. In addition, the Patterson Environmental Response Group has entered into a separate Site Access Agreement with PRC Patterson's Trustee in Bankruptcy. Within the limitations imposed by these two Site Access Agreements, individuals shall be permitted to move freely at the Site and appropriate off-site areas in order to conduct actions which US-EPA determines to be necessary.

Respondents shall submit to US-EPA, upon request, the results of all sampling or tests and all other data generated by Respondents or their Contractors, or on Respondents' behalf during implementation of this Order.

6. Record Retention, Documentation, Availability of Information

Respondents, individually or through their designated contractor, shall preserve all documents and information relating to work performed under this Order, or relating to the hazardous substances found on or released from the Site, for five (5) years following completion of the Removal Action required by this Order. The record retention and preservation obligation created by this paragraph applies only to those documents in the possession, custody and control of Respondents or their contractor, and does not apply to the documents or records left at the Site by PRC.

Respondents may assert a business confidentiality claim pursuant to 40 C.F.R. § 2.203(b) with respect to part or all of any information submitted to US-EPA pursuant to this Order, provided such claim is allowed by Section 104(e)(7) of CERCLA, 42 U.S.C. § 9604(e)(7). US-EPA shall disclose information covered by a business confidentiality claim only to the extent permitted by, and by means of the procedures set forth at, 40 C.F.R. Part 2, Subpart B. If no such claim accompanies the information when it is received by US-EPA, US-EPA may make it available to the public without further notice to Respondents.

7. Off-Site Shipments

All hazardous substances, pollutants or contaminants removed off-site pursuant to this Order for treatment, storage, or disposal shall be treated, stored, or disposed of at a facility in compliance with OSWER Directive Number 9834.11, November 13, 1987. As of the date of this Order, the US-EPA has approved of all facilities where hazardous substances, pollutants or contaminants were sent for treatment, storage, or disposal. The US-EPA will provide information on the acceptability of any additional facility under Section 121(d)(3) of CERCLA and the above directive.

///

8. Compliance with Other Laws

Respondents shall perform all actions required pursuant to this Order in accordance with all applicable local, state and federal laws and regulations except as provided in CERCLA Section 121(e). In accordance with 40 C.F.R. 300.415(j) all on-site actions required pursuant to this Order shall, to the extent practicable considering the exigencies of the situation as determined by US-EPA, comply with applicable or relevant and appropriate requirements under federal environmental, state environmental or facility siting laws.

9. Emergency Response and Notification of Releases

If any incident or change in site conditions occurs during the actions conducted pursuant to this Order, which causes or threatens to cause an additional release of hazardous substances from the Site or an endangerment to the public health, welfare, or the environment, Respondents shall immediately take all appropriate action in order to prevent, abate or minimize such release or endangerment caused or threatened by the release. Respondents shall take these actions in accordance with all applicable provisions of this Order, including, but not limited to the Health and Safety Plan. Respondents shall also immediately notify the OSC or, in the event of his/her unavailability, shall notify the alternate OSC designated in this Order. If neither the OSC or alternate OSC is available, Respondents shall notify the US-EPA Region IX Emergency Response Unit, by telephone at (415).744-2000 of the incident or site conditions.

If Respondents fail to respond, US-EPA may respond to the release or endangerment, and Respondents shall reimburse US-EPA for all costs and attorneys' fees incurred responding to the threat or endangerment.

In addition, in the event of any release of a hazardous substance from the Site, Respondents shall immediately notify US-EPA, Region IX at telephone number (415) 744-2000 and the National Response Center at telephone number (800) 424-8802. Respondents shall submit a written report to US-EPA within seven (7) days after each release, setting forth the events that occurred and the measures taken or to be taken to mitigate any release or endangerment caused or threatened by the release and to prevent the reoccurrence of such a release. This reporting requirement is in addition to, not in lieu of, reporting under CERCLA Section 103(c) and Section 304 of the Emergency Planning and Community Right-To-Know Act of 1986, 42 U.S.C. Sections 11001 et seq.

The requirements of this Paragraph do not apply to any incident, or change in conditions relating to actions conducted pursuant to the Chevron Order, or releases or threats of releases, or an endangerment to the public health, welfare, or the environment related to the subject matter of the Chevron Order, including Storage Tank S-3, provided that such threat or endangerment is not caused by any activity that is the subject of or in the course of this Order.

10. NCP Compliance

All work performed by Respondents to comply with UAO 98-12, UAO 98-12A and this Order is consistent with the National Contingency Plan.

**VIII. AUTHORITY OF THE EPA ON-SCENE COORDINATOR**

US-EPA's OSC shall be responsible for overseeing Respondents' implementation of this Order. The OSC shall have the authority vested in an OSC by the NCP, including the authority to halt, conduct, or direct any work required by this Order. Absence of the OSC from the Site shall not be cause for stoppage of work unless specifically directed by the OSC.

**IX. DISPUTE RESOLUTION**

The Parties to this Order shall attempt to resolve, expeditiously and informally, any disputes concerning this Order.

If Respondents object to any US-EPA action taken pursuant to this Order, including billings for future response costs, if any, Respondents shall notify US-EPA in writing of their objections within thirty (30) days of such action, unless the objections otherwise have been informally resolved. All written notices required by this Section shall be given as set forth in Section XXIII of this Order, "Provision of Notice." If Respondents and US-EPA are unable to resolve the dispute by informal negotiation, upon written notice to US-EPA, the Respondents may initiate an alternative dispute resolution ("ADR") process, including, but not limited to mediation or fact finding, to be utilized by the parties to facilitate formal negotiations.

US-EPA and Respondents shall have 30 days from US-EPA's receipt of the Respondents' written objections to attempt to resolve the dispute through formal negotiations (the "Negotiation Period"). The Negotiation Period may be extended at the sole discretion of US-EPA. US-EPA's decision regarding an extension of the Negotiation Period shall not constitute a US-EPA action subject to dispute resolution or final agency action giving rise to judicial review.

The parties to this Order agree to select an ADR professional in accordance with the following procedures:

- a. Within 10 days of receipt of the Respondents' notice to initiate use of ADR, the OSC shall forward to Respondents a list of ADR professionals ("ADR Selection List") available through the Dispute Resolution Support Services Contract managed by US-EPA.
- b. Within five (5) days of Respondents' receipt of the ADR Selection List, the parties shall provide each other in writing the names of 5 persons from the ADR

Administrative Order Consent 2000-15  
PRC Patterson Superfund Removal Site

Selection List proposed to serve as ADR professionals for the matter in dispute. The ADR professionals proposed by each Party shall not have any past, present, or planned future business relationships with the parties, other than for ADR activities.

- c. Within two (2) days of the receipt of the list of proposed ADR professionals, each party shall advise the other in writing of acceptable professionals. The parties shall select an ADR professional from the list of acceptable professionals and enter a contract for ADR services with such person within 20 days of the receipt of the list of proposed ADR professionals.

US-EPA agrees to extend the Negotiation Period as appropriate to allow for selection and contracting with ADR professionals. However, inability to select an ADR professional or to execute a contract for ADR services shall not extend the Negotiation Period beyond that specified by US-EPA.

Meetings or conferences with the ADR professional shall be treated as confidential. Statements made by any person during any such meetings or conferences shall be deemed to have been made in compromise negotiations within the meaning of Rule 408 of the Federal Rules of Evidence and applicable state rules of evidence, and shall not be offered in evidence in any proceeding by any person. The ADR professional shall be disqualified as a witness, consultant, or expert in any impending or future legal action relating to the subject matter of this Order, including those legal actions between persons not a party to the mediation. If the selected ADR professional fails to comply with the confidentiality requirements of this section, his/her contract will be terminated and he/she will be excluded from any future mediation under this Order. If a party, whether a Respondent or US-EPA, fails to comply with the confidentiality requirements of this Section, then that party will forfeit its rights under this Order to request future use of ADR, if any remain, and, a Respondent may be responsible for stipulated penalties for such breach as provided in Section XII, "Stipulated and Statutory Penalties."

Any agreement reached by the Parties pursuant to this Section shall be in writing, signed by the parties, and shall upon the signature by the parties be incorporated into and become an enforceable element of this Order. If the parties are unable to reach an agreement within the Negotiation Period, a US-EPA management official, of Section Chief level or higher, will issue a written decision on the dispute to the Respondents. The decision of the management official shall be incorporated into and become an enforceable element of this Order on Respondents' receipt of the decision regarding the dispute. Respondents' obligations under this Order shall not be tolled by submission of any request for dispute resolution under this Section.

Following resolution of the dispute, as provided by this Section, Respondents shall fulfill the requirement that was the subject of the dispute in accordance with the agreement reached during

the Negotiation Period or through ADR, whichever occurs. No US-EPA decision made pursuant to this Section shall constitute a final agency action giving rise to judicial review.

#### **X. FORCE MAJEURE**

Respondents agree to perform all requirements under this Order within the time limits established under this Order, unless the performance is delayed by a force majeure. For purposes of this Order, a force majeure is defined as any event arising from causes beyond the control of Respondents or of any entity controlled by Respondents, including but not limited to their Contractors and subcontractors, which delays or prevents performance of any obligation under this Order despite Respondents' best efforts to fulfill the obligation. Force majeure does not include financial inability to complete the work or increased cost of performance.

Respondents shall notify US-EPA orally within 24 hours after the event, and in writing within (5) business days after Respondents become or should have become aware of events that constitute a force majeure. Such notice shall: identify the event causing the delay or anticipated delay; estimate the anticipated length of delay, including necessary demobilization and re-mobilization; state the measures taken or to be taken to minimize the delay; and estimate the timetable for implementation of the measures. Respondents shall take all reasonable measures to avoid and minimize the delay. Failure to comply with the notice provision of this section shall waive any claim of force majeure by the Respondents.

If US-EPA agrees that a delay in performance of a requirement under this Order is or was attributable to a force majeure, the time period for performance of that requirement shall be extended by written agreement between US-EPA and Respondents.

An extension of the time for performance of the requirement directly affected by the force majeure event shall not, of itself, extend the time for performance of any subsequent requirement.

If US-EPA does not agree that the delay in performance of a requirement under this Order is or was attributable to a force majeure, or does not agree with Respondents' on the length of the extension, the issue shall be subject to the dispute resolution procedures set forth in this Order.

#### **XI. RESERVATION OF RIGHTS**

Except as specifically provided in this Order, nothing herein shall limit the power and authority of US-EPA or the United States to take, direct, or order all actions necessary to protect public health, welfare, or the environment or to prevent, abate, or minimize an actual or threatened release of hazardous substances, pollutants or contaminants, or hazardous or solid waste on, at, or from the Site. Further, nothing herein shall prevent US-EPA from seeking legal or equitable relief to enforce the terms of this Order, from taking other legal or equitable action as it deems

appropriate and necessary, or from requiring the Respondents in the future to perform or pay for additional activities pursuant to CERCLA or any other applicable law. In addition to the rights retained in this Section or Section XIII, "Other Claims," this Section shall not affect or otherwise prejudice any rights or action against any person, including Respondents, with respect to criminal liability and liability for damages for injury to, destruction of, or loss of natural resources, and for the costs of any natural resource damage assessments.

This Order expressly does not address, include, or otherwise affect the liability of any Respondent or RFA arising out of property conditions at the Site unknown at the time of completion of the Removal Action to be performed pursuant to this Order.

## **XII. STIPULATED AND STATUTORY PENALTIES**

After a notice of non-compliance with this Order and a reasonable opportunity to cure, for each day or portion thereof that Respondents fail to perform fully any requirements of this Order in accordance with any schedule established pursuant to this Order, including those stated in any plan approved pursuant to UAO 98-12 and UAO 98-12A and adopted by this Order, within the sole discretion of US-EPA, Respondents shall be liable as follows:

After a notice of non-compliance with this Order and a reasonable opportunity to cure, then on receipt of written demand by US-EPA, Respondents shall make payment to US-EPA within 15 days. Interest shall accrue on late payments as of the date the payment is due, commencing with the date of the written demand for payment of penalties under this Section.

A "reasonable opportunity to cure," as used in this Section, shall not exceed thirty (30) days unless otherwise determined by EPA in its sole discretion and expressly stated in writing by US-EPA. Penalties shall accrue and be assessed after the expiration of the reasonable opportunity to cure, and shall relate back to the date of the action or inaction germane to the notice of non-compliance. Even if violations are simultaneous, separate penalties shall accrue for separate violations of this Order. The payment of penalties shall not alter in any way Respondents' obligations to complete the performance of the the Removal Action required under this Order.

The following stipulated penalties shall accrue per violation per day as follows:

<u>Period of Non-Compliance</u>	<u>Penalty per Violation per Day</u>
First Day through 14 <sup>th</sup> day	\$750
15 <sup>th</sup> day through 30 <sup>th</sup> day	\$2,500
31 <sup>st</sup> day and thereafter	\$5,000

Respondents may also be subject to punitive damages in an amount up to three times the amount of any cost incurred by the United States as a result of such violation. Should Respondents violate this Order or any portion thereof, US-EPA may carry out any required action unilaterally,

pursuant to CERCLA Section 104 (42 U.S.C. §9604), and may seek judicial enforcement of this Order.

### **XIII. OTHER CLAIMS/RESPONDENTS' COVENANT NOT TO SUE**

By issuance of this Order, the United States and US-EPA assume no liability for injuries or damages to persons or property resulting from any acts or omissions of Respondents. The United States shall not be deemed a party to any contract entered into by the Respondents or their directors, officers, employees, agents, successors, representatives, assigns, Contractors, or consultants in carrying out actions pursuant to this Order.

Except as expressly provided in Section XIV of this Order, "Covenant Not to Sue," nothing in this Order constitutes a satisfaction of or release from any claim or cause of action against the Respondents, the RFAs, or any person not a party to this Order, for any liability such person may have under CERCLA, other statutes, or the common law, including but not limited to any claims of the United States for costs, damages and interest under Sections 106(a) and 107(a) of CERCLA, 42 U.S.C. §§9606(a) and 9607(a).

This Order does not constitute a preauthorization of funds under Section 111(a)(2) of CERCLA, 42 U.S.C. §9611(a)(2). The Respondents waive any claim to payment under Sections 106(b), 111, and 112 of CERCLA, 42 U.S.C. §§9606(b), 9611, and 9612, against the United States or the Hazardous Substance Superfund arising out of any action performed under this Order.

The Respondents further covenant not to sue and agree not to assert any claims or causes of action against the United States for the US-EPA's selection of the response actions, oversight of the response activities, or approval of plans for such activities, that were conducted as part of the Removal Action. However, this Order does not, and is not intended to, modify or amend the terms or conditions of the final Cash-Out Settlement Agreement by and between the RFA's and the Trust.

No action or decision by US-EPA pursuant to this Order shall give rise to any right to judicial review except as set forth in Section 113(h) of CERCLA, 42 U.S.C. §113(h).

### **XIV. UNITED STATES COVENANT NOT TO SUE**

Except as provided in Section XI (US-EPA Reservation of Rights) and XIII (Other Claims/Respondents' Covenant Not to Sue) of this Order, in consideration for the Removal Action performed, for the payments made and to be made by the RFAs, Respondents' performance of the obligations specified in this Order, and with consideration toward the findings set forth in Section IV(22), pursuant to CERCLA §122(h) US-EPA covenants not to sue Respondents pursuant to Sections 106 and 107(a) of CERCLA, or to take administrative action against Respondents or RFAs pursuant to Sections 106 and 107(a) of CERCLA for Oversight

Administrative Order Consent 2000-15  
PRC Patterson Superfund Removal Site

Costs, or the performance of the Removal Action. US-EPA further covenants not to sue Respondents pursuant to Sections 106 and 107(a) of CERCLA, and covenants not to take administrative action against Respondents or RFAs pursuant to Section 106 and 107(a) of CERCLA, for any work required by US-EPA or any US-EPA response costs incurred in connection with the Vernalis Site, the ARCO Order or the Chevron Order.

As to Respondents, these covenants not to sue are conditioned on the complete and satisfactory performance by Respondents of their obligations under this Order. As to RFAs, these covenants not to sue are conditioned on the additional payment on behalf of the RFAs required by the final Cash-Out Settlement Agreement among the Trust and the RFAs. These covenants not to sue extend only to the Respondents and RFAs and do not extend to any other person.

**XV. CONTRIBUTION PROTECTION**

Except as expressly set forth herein, nothing in this Order shall be construed to create any rights in, or grant any cause of action to, any person not a Party to this Order. In consideration of the Removal Action performed and to be completed by Respondents, and in consideration of the payments made and to be made by the RFAs, with regard to claims for contribution against Respondents or RFAs for matters addressed in this Order, the Parties hereto agree that the individual Respondents and RFAs are entitled to protection from contribution actions or claims, including any such claims by any persons not Parties to this Order, relating to the matters addressed in this Order to the maximum extent provided by Section 113(f), and 122(h)(4) of CERCLA, 42 U.S.C. Sections 9613(f), and 9622(h)(4).

For purposes of this Section XV, the "matters addressed" in this Order shall include all costs or liability for the Removal Action, Oversight Costs, costs incurred in relation to the wastes at the Vernalis Site, and the matters addressed in the ARCO Order and the Chevron Order.

Nothing in this Order precludes US-EPA, Respondents, or RFAs from asserting any claims, causes of action or demands against any persons not Parties to this Order for indemnification, contribution, or cost recovery. Furthermore, nothing in this Order modifies or amends the terms and conditions of the respective Cash-Out Settlement Agreements by and between the Trust and each other Respondent or the RFAs. This Order does not extinguish or otherwise affect any contribution or contractual indemnity rights or claims between the Trust and each Respondent or the RFAs, to the extent that those contribution or contractual indemnity rights or claims have not been specifically released under the terms of the respective Cash-Out Settlement Agreements by and between the Trust and each other Respondent or the RFAs. Furthermore, this Order does not extinguish or otherwise affect any contribution or contractual indemnity rights or claims between the Trust and each Trust member, to the extent such contribution or contractual indemnity rights or claims are reserved between the Trust and each Trust member in the Stage II Site Participation Agreement, including amendments.

#### **XVI. INDEMNIFICATION**

Respondents agree to indemnify, save and hold harmless the United States, its officials, agents, Contractors, subcontractors, employees and representatives from any and all claims or causes of action: (A) arising from, or on account of, acts or omissions of Respondents, Respondents' officers, heirs, directors, employees, agents, Contractors, subcontractors, receivers, trustees, successors or assigns, in carrying out actions pursuant to this Order; and (B) for damages or reimbursement arising from or on account of any contract, agreement, or arrangement between any one or more of Respondents, and any persons for performance of work on or relating to the Site, including claims on account of construction delays, but excluding the subject matter of, or actions relating to, the Chevron Order, when the cause or damages or claims for indemnification is not the result of any action or activity of the Respondents.

The requirements of this Paragraph do not apply to any incident, or change in conditions relating to actions conducted pursuant to the Chevron Order, or releases or threats of releases, or an endangerment to the public health, welfare, or the environment related to the subject matter of the Chevron Order, including Storage Tank S-3, so long as the incident, change in conditions, releases or threats of releases are not the result of any action or activity of the Respondents.

Respondents agree to pay the United States all costs incurred by the United States, including litigation costs, arising from or on account of claims made against the United States based on any of the acts or omissions referred to in this Section. Respondents waive all claims against the United States for damages or reimbursement or for set-off of any payments made or to be made to the United States arising from or on account of any contract, agreement, or arrangement between any one or more of Respondents and any person for the performance of work on or relating to the Site, including, but not limited to claims on account of construction delay.

#### **XVII. APPROVAL OF TRUST AS MECHANISM TO COMPLETE THE REMOVAL ACTION**

The Patterson Environmental Response Trust ("Trust") was established by the members of the Group to provide a mechanism for funding and completing the Removal Action at the Site. The Trust was established by a Declaration and Agreement of Trust effective October 22, 1998, amended on February 16, 1999 and on November 30, 1999. Each Respondent has made a contribution to the Trust that is acceptable to the Trust, and as consideration for such contribution, the Trust, by and through its trustees, has assumed the obligations of the Respondents set forth in this Order. Therefore, unless the Trust, by and through its trustees, fails to complete the Removal Action or otherwise breaches the terms of this Order, each Respondent will have satisfied the activities required by UAO 98-12 and UAO 98-12A pursuant to CERCLA. Accordingly, US-EPA approves of the Trust as a mechanism to complete the Removal Action.

### **XVIII. MODIFICATIONS**

If Respondents seek permission to deviate from the requirements of this Order or any approved work plan or schedule, Respondents' Project Coordinator shall submit a written request to the US-EPA OSC for approval, outlining the proposed modification and its basis. US-EPA's OSC shall respond to any such written request in writing within ten (10) days, approving, approving with conditions, or denying Respondents' request. If Respondents disagree with the decision of the OSC, they may follow the procedures set forth in the Dispute Resolution section of this Order.

No informal advice, guidance, suggestion, or comment by US-EPA regarding reports, plans, specifications, schedules, or any other writing submitted by the Respondents shall relieve the Respondents of their obligation to obtain such formal approval as may be required by this Order, and to comply with all requirements of this Order unless it is formally modified.

### **XIX. NOTICE OF COMPLETION**

When US-EPA determines, after US-EPA's review of the Final Report, described in Section VII, Paragraph 4 of this Order, that the Removal Action has been fully performed in accordance with this Order, with the exception of any continuing obligations required by this Order, US-EPA will provide notice to the Respondents of such determination. If US-EPA determines that the Removal Action has not been completed in accordance with this Order, US-EPA will notify the Respondents, provide a list of the deficiencies, and require that Respondents correct such deficiencies. Respondents shall correct such deficiencies and shall submit a modified Final Report in accordance with US-EPA's notice. Failure by Respondents to correct the identified deficiencies shall be a violation of this Order.

### **XX. PUBLIC COMMENT**

Section 122(i) of CERCLA, 42 U.S.C. Section 9622(i), requires US-EPA to publish notice of this proposed settlement in the Federal Register, to provide persons who are not parties to the proposed settlement an opportunity to comment, and to consider comments filed in determining whether to consent to the proposed settlement. After consideration of any comments submitted during the thirty (30) day public comment period held pursuant to Section 122(i) of CERCLA, US-EPA may withdraw or withhold consent to this Order if comments received disclose facts or considerations that indicate that this Order is inappropriate, improper or inadequate.

### **XXI. SEVERABILITY**

If a court issues an order that invalidates any provision of this Order, or finds that Respondents or RFAs have sufficient cause not to comply with one or more provisions of this Order, the

Administrative Order Consent 2000-15  
PRC Patterson Superfund Removal Site

Respondents and RFAs shall remain bound to comply with all provisions of this Order not invalidated or determined to be subject to a sufficient cause or defense by the court's order.

**XXII. EFFECTIVE DATE**

This Order shall be effective five (5) days after the Order is signed by the Regional Director of Superfund Division or his designee (the "Effective Date"). The signing of this Order by the Regional Director of Superfund Division or his designee follows the Public Comment period described in Section XX of this Order.

**XXIII. PROVISION OF NOTICE**

Any written notice required to be given pursuant to this Order shall be sent via overnight mail. Such notice shall be given as follows:

PRC Patterson Superfund Removal Site

Any oral notice required to be given pursuant to this Order may be given to the respective Parties using the telephone numbers referenced above. Any Party may change its address for notice purposes by sending a notice of address change to the other Parties.

**XXIV. EXECUTION IN COUNTERPARTS**

This Order may be executed in any number of counterparts, each of which when executed and delivered to US-EPA shall be deemed to be an original, but such counterparts shall together constitute one and the same document. The Parties agree that proof of execution can be made by a Party providing a facsimile copy of an original signature.

It is so ORDERED and Agreed this 11<sup>th</sup> day of October 2001.

### **LIST OF REPORTS AND WORKPLAN SUBMITTALS TO US-EPA**

#### **PRC PATTERSON SUPERFUND SITE PATTERSON, CALIFORNIA**

Clayton Group Services, Inc. or the United States Environmental Protection Agency prepared the following letters, reports, and workplans which define activities, schedules, and scope of work required under UAO 98-12 as amended UAO 98-12A.

- ▶ **September 18, 1998 (Clayton)**  
Health & Safety Plan  
Presents health and safety procedures for sampling and characterization activities at the former PRC facility.
- ▶ **September 18, 1998 (Clayton)**  
Sampling and Analysis Plan  
Defines sampling and analysis procedures to investigate, inventory, and characterize the various wastes at the PRC site.
- ▶ **September 28, 1998 (Clayton)**  
Workplan to Secure PRC Site  
Letter to USEPA discussing the scope of work to perform immediate response actions to secure and stabilize the PRC site as directed by USEPA including stabilizing several immediate threats associated with various chemical drums, storage tank valves, and laboratory chemicals at the site.
- ▶ **October 9, 1998 (United States Environmental Protection Agency)**  
Schedule of Activities for Sampling & Analysis Plan  
Letter to USEPA discussing the schedule of initial activities.
- ▶ **October 14, 1998 (Clayton)**  
Contingency Plan  
Presents contingency plans and measures for the site, site personnel, and local response agencies to minimize hazards to human health and the environment that might occur from a fire or major spill or release of hazardous materials at the former PRC facility.
- ▶ **October 19, 1998 (United States Environmental Protection Agency)**  
PRC Patterson Site, UAO 98-12  
Letter from United States Environmental Protection Agency granting approval of the Sampling and Analysis Plan.

- ▶ **November 25, 1998 (Clayton)**  
Preliminary Workplan to Winterize the PRC Site  
 Specifies the scope of work for immediate response actions to winterize the PRC site including; drawing down liquid level in Tank S-4, recycling used waste oil filter drums (approximately 1,100 drums); and recycling of oil layers from various on-site tanks (about 240,000 gallons).
  
- ▶ **December 3, 1998 (Clayton)**  
Draft Removal Workplan  
 The draft Removal Workplan describes the proposed removal activities for oil, water, sludge and other wastes at the PRC site and presents the schedule for completing the work.
  
- ▶ **January 19, 1999 (United States Environmental Protection Agency)**  
Petroleum Recycling Corporation Facility Workplan  
 Letter from United States Environmental Protection Agency substantially approving the draft Removal Workplan with comments.
  
- ▶ **March 1, 1999 (Clayton)**  
Removal Workplan and Cover letter  
 The Removal Workplan describes the proposed removal activities for oil, water, sludge and other wastes at the PRC site and presents the schedule for completing the work.
  
- ▶ **March 1, 1999 (Clayton)**  
Sampling and Analysis Report  
 Presents the results of the initial waste material investigation, inventory, and characterization work performed in October 1998.
  
- ▶ **March 9, 1999 (United States Environmental Protection Agency)**  
PRC Patterson Site, UAO 98-12  
 Letter from United States Environmental Protection Agency granting approval of the time schedule for the Removal Workplan.
  
- ▶ **March 18, 1999 (Clayton)**  
Dioxin Testing Results  
 Transmits the analytical analyses on PRC wastewater for the presence of dioxins and related isomers to USEPA.
  
- ▶ **April 2, 1999 (United States Environmental Protection Agency)**  
PRC Patterson Site, UAO 98-12  
 Letter from United States Environmental Protection Agency granting approval for the use of US Filter facility in Vernon California for the disposal of wastewater.

- ▶ **June 17, 1999 (Clayton)**  
Community Relations Plan  
 The Community Relations Plan explains the specific actions that have been implemented and performed to date, and identifies the future actions that will be taken to provide the City of Patterson and the surrounding community with the opportunity for meaningful input into the cleanup of the PRC Patterson site.
  
- ▶ **June 21, 1999 (Clayton)**  
Potentially Applicable or Relevant and Appropriate Requirements "Draft"  
 Discusses the preliminarily identified potential applicable or relevant and appropriate requirements (ARARs) associated with potential sludge removal alternatives.
  
- ▶ **June 21, 1999 (Clayton)**  
Supplemental Sludge Sampling and Analysis Report  
 Describes additional sludge sampling and subsequent analyses that were completed in during April and May 1999 following the removal of oil and water that previously was overlying the sludge.
  
- ▶ **July 16, 1999 (Clayton)**  
Applicable and Appropriate or Relevant Requirements (ARARs)  
 Submission of the ARARs associated sludge disposal to the United States Environmental Protection Agency for their review.
  
- ▶ **September 17, 1999 (Clayton)**  
Draft Engineering Evaluation and Cost Analysis  
 Presents the draft Engineering Evaluation and Cost Analysis to the United States Environmental Protection Agency and the public at large for their review and comment.
  
- ▶ **September 21, 1999 (United States Environmental Protection Agency)**  
Engineering Evaluation and Cost Analysis for Sludge Removal  
 Letter from the United States Environmental Protection Agency responding to the draft Engineering Evaluation and Cost Analysis.
  
- ▶ **September 29, 1999 (Clayton)**  
Approval of Sludge Disposal Alternative, Schedule and Contractors  
 Letter to the United States Environmental Protection Agency requesting approval of the sludge disposal alternative presented in the draft Engineering Evaluation and Cost Analysis
  
- ▶ **October 20, 1999 (United States Environmental Protection Agency)**  
Sludge Removal  
 Letter from United States Environmental Protection Agency approving with conditions the sludge disposal alternative presented in the draft Engineering Evaluation and Cost Analysis.

- ▶ **November 4, 1999 (Clayton)**  
Contingency Plan for Sludge Removal  
Presents updated contingency plans and measures for the site, site personnel, and local response agencies to minimize hazards to human health and the environment that might occur from a fire or major spill or release of hazardous materials at the former PRC facility.
  
- ▶ **November 4, 1999 (Clayton)**  
Sludge Removal Workplan  
Specifies the scope of work, methods, and schedule for the sludge removal activities.
  
- ▶ **November 4, 1999 (Clayton)**  
Health and Safety Plan  
Presents health and safety procedures for sludge removal activities at the former PRC facility.
  
- ▶ **November 19, 1999 (Clayton)**  
Response to Comments on the Sludge Removal Workplan  
Responds to comments by the United States Environmental Protection Agency and confirms their verbal approval of the Sludge Removal Workplan.
  
- ▶ **December 8, 1999 (Clayton)**  
Tank Inspection Report for Sludge Removal Workplan  
Presents the tank inspection report for the F-Series tanks as requested by the United States Environmental Protection Agency
  
- ▶ **January 28, 2000 (Clayton)**  
Discovery of Underground Storage Tank  
Letter to the United States Environmental Protection Agency providing notice of the discovery of an underground storage tank.
  
- ▶ **February 9, 2000 (Clayton)**  
Final Engineering Evaluation and Cost Analysis for Sludge Removal  
Presents the final Engineering Evaluation and Cost Analysis to the United States Environmental Protection Agency and the public and documents the public comments and responses to comments.
  
- ▶ **February 28, 2000 (United States Environmental Protection Agency)**  
Petroleum Recycling Corporation Facility  
Letter from the United States Environmental Protection Agency requiring the removal of all tanks, contiguous berms, pipelines, and the underground storage tank.

- ▶ **April 18, 2000 (Clayton)**  
Completion of Removal Actions  
Letter to the United States Environmental Protection Agency requesting approval of the proposed site demolition activities.
  
- ▶ **April 19, 2000 (United States Environmental Protection Agency)**  
Demolition Scope of Work  
Letter from the United States Environmental Protection Agency approving the proposed scope of demolition activities.
